File No. 34533495

APPRAISAL OF

LOCATED AT:

79 Eaton Ave Daly City, CA 94015

FOR:

Wedgewood Inc 2015 Manhattan Beach Blvd Suite 100 Redondo Beach, CA, 90278

BORROWER:

Redwood Holdings LLC

AS OF:

August 25, 2023

BY:

Mehdi Mehdipour-Mossafer

Clear Capital Wedgewood Inc 2015 Manhattan Beach Blvd Suite 100 Redondo Beach, CA, 90278

File Number: 34533495

In accordance with your request, I have appraised the real property at:

79 Eaton Ave Daly City, CA 94015

The purpose of this appraisal is to develop an opinion of the market value of the subject property, as improved. The property rights appraised are the fee simple interest in the site and improvements.

In my opinion, the market value of the property as of August 25, 2023

is:

\$780,000 Seven Hundred Eighty Thousand Dollars

The attached report contains the description, analysis and supportive data for the conclusions, final opinion of value, descriptive photographs, limiting conditions and appropriate certifications.

d' Mahchipour

Mehdi Mehdipour-Mossafer

Swift & Sound appraisal (650)-793-2557

Exterior-Only Inspection Residential Appraisal Report File No. 34533495

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a visual inspection of the exterior areas of the subject property from at least the street, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

The appraiser must be able to obtain adequate information about the physical characteristics (including, but not limited to, condition, room count, gross living area, etc.) of the subject property from the exterior-only inspection and reliable public and/or private sources to perform this appraisal. The appraiser should use the same type of data sources that he or she uses for comparable sales such as, but not limited to, multiple listing services, tax and assessment records, prior inspections, appraisal files, information provided by the property owner, etc.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concessions but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.

2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.

3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

4. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.

5. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

Exterior-Only Inspection Residential Appraisal Report

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.

2. I performed a visual inspection of the exterior areas of the subject property from at least the street. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.

3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.

5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.

6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.

7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.

8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.

9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.

10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.

11. I have knowledge and experience in appraising this type of property in this market area.

12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.

13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.

14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.

15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.

16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.

17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.

18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).

19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

Exterior-Only Inspection Residential Appraisal Report File No. 34533495

22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.

24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.

4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

Uniform Appraisal Dataset Definitions

Condition Ratings and Definitions

C1 The improvements have been very recently constructed and have not previously been occupied. The entire structure and all components are new and the dwelling features no physical depreciation.*

*Note: Newly constructed improvements that feature recycled materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100% new foundation and the recycled materials and the recycled components have been rehabilitated/re-manufactured into like-new condition. Recently constructed improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (i.e., newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2 The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category either are almost new or have been recently completely renovated and are similar in condition to new construction.

*Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3 The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

*Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4 The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

*Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5 The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

*Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6 The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

*Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1 Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

O2 Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residences constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high-quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

O3 Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4 Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5 Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6 Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure.

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical /functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/ or expansion. A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

The number of full and half baths is reported by separating the two values by a period. The full bath is represented to the left of the period. The half bath count is represented to the right of the period. Three-quarter baths are to be counted as a full bath in all cases. Quarter baths (baths that feature only toilet) are not to be included in the bathroom count.

Borrower: Redwood Holdings LLC	File N	o.: 34533495	
Property Address: 79 Eaton Ave	Case	No.:	
City: Daly City	State: CA	Zip: 94015	
Lender: Wedgewood Inc.			

Neighborhood Description

The neighborhood is formed of single family homes of average to good construction quality and appeal, and some condo / PUDs, with average to good care and upkeep. The neighborhood has average access to shopping, schools, freeways, major electronics employment centers and city facilities. No adverse neighborhood conditions were discovered during the appraisal inspection.

Comments on the predominant value of the single family homes in the neighborhood of the subject:

The subject property is a small single family home, in poor condition and its value is below the predominant value of single family homes in the area. The subject property is not under developed for its market. Please note, the opinion of market value of the subject is below the median sale price of single family homes in the last 6 months, due to high and low end construction.

Neighborhood Market Conditions

There are currently 17 active listings and 17 pending sales of single family homes within one mile radius of the subject, while there are a total of 185 closed sales within the past year, 90 closed sales within the past 41 months, and 58 closed sales within the past 3 months.

Please note, the aforesaid numbers of active listings/pending sales and sold single family homes are not necessarily single family homes that are competing with the subject. These single family homes are indicative of overall inventory and sold units of any kind that are in subject's market within the last year. Please refer to 1004MC form for number of active listings and sold single family homes that area competing with the subject.

Currently, the listing inventory compared to the number of closed sales within the past year, decline in REO. Activity are a clear indication of stabilizing values in subject's neighborhood. Financing in the area is predominantly via conventional loans, and concessions are not typical, although some sellers may pay for non recurring costs of buyers, which tends to expedite sales rather than inflating sales prices. Per MLS statistics, the median sales price for single family homes in subject's market area has changed from \$1,100,000 in 6 months of 08/25/22-02/25/23 \$1,093,000 in 6 months of 02/25/23-08/25/23. Financing in the area is predominantly via conventional loans, and concessions are not typical, although some sellers may pay for non recurring costs of buyers, which tends to expedite sales rather than inflating sales prices.

Comments on the marketability of comparables:

Due to very limited sales activity of applicable single family homes in subject's neighborhood some of the comps might have been selected from beyond the one mile limit of the customary guidelines for their similarities and recent sales dates with similar location appeals. All comparables are located in competing market to the subject. Comparables 3 and 4 where are located across freeway are located in competing market with the subject.

Comments on market condition of the comparables:

Per MLS statistics, the median sales price for single family homes in subject's market area has changed from \$1,100,000 in 6 the months of 08/25/22-02/25/23 to \$1,088,500 in 3 months of 02/25/23-05/25/23 to 1,099,000 in 3 months of 05/25/23-08/25/23. Per Fannie Mae, the fluctuation of value of median sale price of comparables in subject's market indicates a stabilizing values in subject's market. As a result, no market condition adjustment is warranted.

Site Comments

This is basically, slightly above road grade site that is very typical of the neighborhood in terms of size, topography, view and general appeal. It provides a suitable setting for the improvements and is consistent with market expectations in this price range. Landscaping consists of some foundation plantings, shrubbery and a few trees. While no readily apparent adverse site conditions or external factors were noted, many site-related issues are beyond the scope of this assignment. Statements regarding zoning compliance are intended only in the most general sense. Zoning and building ordinances vary significantly from one municipality to another and can be extremely detailed. The scope of this assignment does not include a comparison of every potentially significant characteristic of the subject property's site and improvements relative to zoning and building ordinances. Unless otherwise noted, standard utility and right-of-way easements are insignificant to value. However, a current locational or boundary survey, which was unavailable to the appraiser, may reveal encroachments, easements, zoning violations or other matters of interest that could warrant modification of the appraised value.

The subject property and comparables 2, and 3 are located in the proximity of highway 35. Comparable 1 is backing to a highway 35. Comparable 5 is located on a residential area. Comparable 4 is located in the proximity of Hilldale school. The incurred external obsolescence is a component of adverse site condition which is correctly stated in page 1. However, it appears that the market shows reaction. As such, comparables 1, 4 and 5 are adjusted in this regard.

Prior Sales Comments

Per MLS and NDC (national data collective), subject property had no prior market transaction within the past 3 years.

Per NDC, the comparables 1-5 did not have prior market transactions within the past 12 months.

Comments on Sales Comparison

Among 66 sold and 14 listings/pending sales within the last 12 Months the current most applicable comparables are

	ADDENDOM		
Borrower: Redwood Holdings LLC	File No	.: 34533495	
Property Address: 79 Eaton Ave	Case N	lo.:	
City: Daly City	State: CA	Zip: 94015	
Lender: Wedgewood Inc			

selected.

The adjustments are self explanatory and were based on a combination of studies of paired sales, my experience, discussions with real estate professionals, and MLS descriptions. Living area variances exceeding 100 sf. are adjusted at \$200.00/sf Independently of room count differences. An attempt was made to select the most recent sales due to changing market conditions. Since, the ratio of land utility of the subject is similar to the ration of land utility of comparables, a \$00.00 pr/sf considered for lot sizes exceed 1000 sf. Per MLS statistics, the median sales price for single family homes in subject's market area has changed from \$1,100,000 in 6 months of 08/25/22-02/25/23 \$1,093,000 in 6 months of 02/25/23-08/25/23. Comps 1-5 are closed arm's length transaction. Comparables 1, 4 and 5 are adjusted for the affect of external factors. Comparables 2 and 3 are adjusted for amenities. No personal property has been included in the estimate of market value. Please note, all line adjustments are rounded to the nearest \$500.00.

Due to very limited sales and listings/pending sales activity of applicable single family homes in subject's neighborhood The selling date of comparables 1, 3 and 5 are more than 6 months ago. Comparables 4 and 5 are located beyond one mile radius of the subject. These comparables are selected for its similar location appeal and similar condition to the subject.

The subject property does not have any amenity. Comparables 2 and 3 each has a den. It appears that the market shows reaction. As such, these comparables are adjusted in this regard. The adjustment is made by market reaction/paired sales.

Comments on characteristics of the subject and comparables:

The characteristics information of the subject and the comparables are obtained from local MLS and "ndcdata", the national data collective. However, in case of discrepancy, the characteristic information provided in MLS is utilized because they are more often updated. These comparables are marketed and sold with those characteristic information.

The subject property was built in 1957 and it is in a poor condition. As such, its effective age is estimated to be 30 years and its remaining life is 35 years.

Comments on photos of comparable:

At the time of the inspection the exterior of the subject' from street it appeared that the subject property was suffering from differed maintenance. Due to the scope of work, the appraiser was not ale to verify the extent of the subject's differed maintenance. In rendering the opinion market value of the subject, the appraiser had tried to select comparables that were suffering from differed maintenance. It appeared that all selected comparables were suffering from some kind of differed maintenance at the time of sale and they had been remodeled after sale transactions had been completed. As a result, the MLS photos of all comparable are included in the report to verify the above analysis.

Per market research, the market in the area of subject reacts to the condition of the single family homes rather than their age differential. No adjustment is warranted.

Comments on wider range of unadjusted and adjusted value of the comparables:

Due to very limited sale and active/pending sales activity of applicable single family homes in subject's market, the range of adjusted value of comparables are more than 10% and the range of unadjusted value of comparables are more than 20%. Please note that the most relevant comparables were chosen and adequate adjustments were made to reflect marketable property differences.

Comments on appraiser comparables research:

The appraiser comparable search criteria consisted of single family homes with 800-1350 square feet of GLA, and which sold within the past 12 months, and are located within 2 miles radius within Daly city that have similar marketability as the subject. My comparable search did not include any sales price or value parameters with more than 4500 sf of lot size.

The search resulted in a total of 66 potential comparable properties to consider, from which 5 comparable that are sold in the last 12 months. All comparables are gridded in this appraisal report as listed below:

1-645 Skyline Dr, Daly City, CA 94015
2-90 Menlo Ave, Daly City, CA 94015
3-65 E Wavecrest Dr, Daly City, CA 94015
4-248 Wyandotte Ave, Daly City, CA 94014
5-155 Santa Barbara Ave, Daly City, CA 94014

Final Reconciliation

All three approaches to value were considered in this appraisal. Income approach was not applicable due to predominantly owner occupied homes in the area. Direct sales comparison was given the most weight, and is supported by cost approach.

ADDENDUM

Borrower: Redwood Holdings LLC	File No.:	34533495
Property Address: 79 Eaton Ave	Case No	•
City: Daly City	State: CA	Zip: 94015
Lender: Wedgewood Inc		

All sold comps are recent confirmed closed sales of homes of similar age/size/quality from subject's general neighborhood. The adjustment was made by market reaction/paired sales (when possible). All comps were believed to be in similar site condition. Comparables 1 and 4 are given most weight in the final reconciliation. Comparable 4 has sold in the last 3 months (settled on 05/31/2023) Comparable 1 is located in the proximity of the subject. At the time of sale, It appears that both comparables 1 and 4 had similar condition as the subject. It is my opinion that the subject property is marketable at the indicated market value.

This is a drive by appraiser report and the appraiser have not recently seen the interior of the subject. The opinion market value of the subject is based on information provided in Parcel quest and the local MLS. It is assumed the exterior condition of comparables are similar to the interior condition of the comparables. If the overall condition of the subject is different than the information extracted from NDC and the MLS, the appraiser reserves the right to revisit the opinion market value of the subject. And further more, the use of an extraordinary assumption may affect the assignment's results.

Conditions of Appraisal

The market value reflected in this appraisal is for the "as is" condition of the subject property as of effective date of the appraisal report.

Comments on intended user(s):

The intended user of this appraisal report is the lender/client. The intended use is to evaluate the property that is the subject of this appraisal for a mortgage finance transactions, subject to the stated scope of work, purpose of the appraisal, reporting requirement of this appraisal report from and definition of market value. No additional users are identified by the appraiser.

Cost Approach Comments

Due to diversity of construction qualities, materials, etc. Reference to usual cost manuals is not applicable, but rather discussion with local contractors provides a more realistic overview of various cost elements. It is common in the market area of subject, the land value exceeds 60% of the value of the single family homes. Please note the cost approach to value is not for insurance use.
