Comments Regarding Pricing Strategy		
<p>Subject details are taken from Tax. The value of the subject was derived by trying to stay within the range of the listed and sold comparable, and holding more weight to those comparables that were most similar overall. Recent sales and current prices of comparable listings were used in the marketplace as a guideline for determining the fair market value of the subject property. I had to expand my MLS search out 1 miles in distance and 6 months back in time for sold comparable due to the subject's unique gross living area, lot size and quality of construction. It was necessary to exceed the lot size, year built, bed count and style in an effort to use the best available comparable from within the subject's market area. Comparable S2, and S3 received multiple offers which resulted in an increased final sale price relative to list price. The two most similar comps, Sale 2 and List 1, influenced the subject's value the strongest. Subject is located closer to the main road, water bodies and commercial area. Comparable crossed neighborhood railroad tracks. This however, will not have an effect on value and marketability.</p>
