Comments Regarding Pricing Strategy

Search was expanded to include this whole large semi-rural market area in order to find best comps for subject & to try & bracket subject features. Every effort made to find/use comps with as close proximity as possible. In this case search was expanded up to 2 miles to find best comps & to bracket subject lot size, especially on sold comps. The market has reached a transitional point where the active listings are supporting a lower value than the most recent closed sales. This is well supported by the active listing comps used here. Also current inventory is at it's highest level in months. Rehabbed properties do still sell at the top end of the market. Many sales do involve seller paid concessions currently. The active comps were given equal weight in establishing value.
