| Comments Regarding Pricing Strategy | | |
| <p>Comparison analysis was done by collecting market data, selecting the most appropriate comparable properties, verifying market data, applying appropriate adjustments, and reconciling the various adjusted indicators of value into a value estimate. Market prices are increasing. Low-interest rates, low inventory, and increased demand are driving prices upward. The average marketing time is 90 days. All comps were the closest possible to the subject in lot size, sq ft., and age, no better sale and active comps were found; therefore I include comps over 1 mile far from the subject property with inferior and superior features. I went back 11 months, out in distance 1-miles, GLA 20%-30% variance, age 10 years variance, lot size within 0.10- 0.50 acre. The comps used are the best possible currently available comps within 1-mile and the adjustments are sufficient for this area to account for the differences in the subject and comparables. The estimated adjustments for the comparables noted are as follows; garage \$4000 per garage space.</p> | | |
