SALES COMPARISON APPROACH

I did did not research the sale or transfer history of the subject property and comparable sales. If not, explain

My research did did not reveal any prior sales or transfers of the subject property for the three years prior to the effective date of this appraisal.

Data Source(s) **Realist/MLS**

My research did did not reveal any prior sales or transfers of the comparable sales for the year prior to the date of sale of the comparable sale.

Data Source(s) **Realist/MLS**

Report the results of the research and analysis of the prior sale or transfer history of the subject property and comparable sales (report additional prior sales on page 3).

Analysis of prior sale or transfer history of the subject property and comparable sales **No transfers noted in the last 3 years for subject property or 12 months for comparable sales with exception of comp 1. Comp 5's prior transfer was an affidavit to update the owner of record, not a market sale.**

Summary of Sales Comparison Approach **Emphasis placed on comp 1 as the most recent sale from the immediate Mandalay development with consideration for comps 2 and 3 due to recency, similar size and located in the overall competitive market area. Comp 4 is a short sale with TLC needed per listing agent with condition adjustment warranted based on paired sales analysis. Additionally, this sale is dated over 6 months, included as it is the only other re-sale from subject's immediate development. Comp 2 has been newly updated with renovated kitchen with designer detailing and modern finishes and slight condition adjustment warranted based on paired sales analysis.**

Indicated Value by Sales Comparison Approach \$ **950,000**

Indicated Value by: **Sales Comparison Approach \$ 950,000** **Cost Approach (if developed) \$** **Income Approach (if developed) \$**

Emphasis was placed on the sales comparison approach to value. Income approach was not considered due to a lack of reliable data for SFR's in the area. The cost approach was not deemed necessary for credible assignment resulted for this intended use; due to a lack of similar land sales; therefore it is not developed.

This appraisal is made "as is", subject to completion per plans and specifications on the basis of a hypothetical condition that the improvements have been completed, subject to the following repairs or alterations on the basis of a hypothetical condition that the repairs or alterations have been completed, or subject to the following required inspection based on the extraordinary assumption that the condition or deficiency does not require alteration or repair:

Based on a visual inspection of the exterior areas of the subject property from at least the street, defined scope of work, statement of assumptions and limiting conditions, and appraiser's certification, my (our) opinion of the market value, as defined, of the real property that is the subject of this report is \$ 950,000 , as of 11/15/2023 , which is the date of inspection and the effective date of this appraisal.

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a visual inspection of the exterior areas of the subject property from at least the street, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

The appraiser must be able to obtain adequate information about the physical characteristics (including, but not limited to, condition, room count, gross living area, etc.) of the subject property from the exterior-only inspection and reliable public and/or private sources to perform this appraisal. The appraiser should use the same type of data sources that he or she uses for comparable sales such as, but not limited to, multiple listing services, tax and assessment records, prior inspections, appraisal files, information provided by the property owner, etc.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
4. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
5. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).

SITE COMMENTS:

Generally, no adverse site conditions were noted during the inspection of the subject property. No signs of slippage, settlement, or unusual erosion were observed.

See the preliminary title report for any adverse conditions, easements, or other site factors of public record. The preliminary title report was not reviewed as a part of this appraisal.

COMMENTS ON SALES COMPARISON:

The sales comparison is based on the principle of substitution which is defined by the Appraisal Institute as follows: "The principle of substitution as applied in the sales comparison approach holds that the value of a property that is replaceable in the market tends to be set by the cost of acquiring an equally desirable substitute property." This principle is applied using accepted methods of paired sales analysis, when possible, and by applying adjustments to generally accepted units of comparison.

Bracketing of living area and sales prices is used whenever possible to ensure that a range of value for the subject is reasonably estimated.

A methodical twenty-four month search of the immediate subject market area was performed for recent comparable sales, listings, and pending sales that have occurred.

All sales are located in subject's market area and represent a good indication of value.

Comparables were adjusted for differences in square footage at the rate of \$150 per square foot for differences of more than 100 square feet. This is considered appropriate given the surrounding neighborhood's quality of construction and demand. Bedrooms were adjusted at the rate of \$10,000 per bedroom. Bathrooms were adjusted at the rate of \$5,000 per half bath. Room totals were not adjusted as they were considered adjusted with the square footage. Lot sizes were adjusted at the rate of \$3 per square foot for differences of more than 5,000 square feet. Due to significant condition and GLA adjustments for comp 4, gross/net adjustments exceeds general guidelines. The most similar sales were relied upon, adjustments are bracketed, generally accepted in the market, and necessary to reflect market reaction to the differences.

Other amenities/features were adjusted as shown. The adjustments are considered appropriate and based on paired sales analysis whenever possible.

HIGHEST & BEST USE:

The existing use supports the four functions of Highest and Best Use both as vacant and as improved. The current use is physically possible, legally permissible, financially feasible and is the most productive use of the site. Any change now or in the foreseeable future is unlikely.

The appraisal was prepared in accordance with the requirements of Title XI of the Financial Institutions, Reform, Recovery, and Enforcement Act (FIRREA) of 1989, as amended (12 U.S.C. 3331 et seq.).

AIR

No Employee, director, officer or agent of the lender, or any other third party acting as a joint venture partner, independent contractor, appraisal management company or partner on behalf of the lender has influenced or attempted to influence the development, reporting, result of review of this assignment through coercion, extortion, collusion, compensation, instruction, inducement, intimidation, bribery or in any other manner.

Solar photovoltaic panels are leased. The maintenance is provided by the leasing agent and subject continues to be connected to public power grid. This feature does not negatively affect marketability in any way due to cost savings to a typical buyer.
