Exterior-Only Inspection Residential Appraisal Report 348066 File # 55853

34806855

Clarification of Intended Lies and Intended Lieses	
Clarification of Intended Use and Intended User:	
"The Intended User of the appraisal report is the Lender/Client. Unless speci	ically stated within the report, there are no additional Intended Users. The
Intended Use is to evaluate the property that is the subject of this appraisal for	r a mortgage finance transaction, subject to the stated Scope of Work,
purpose of the appraisal, reporting requirements of this appraisal report form,	and Definition of Value as defined in the report."
<u> </u>	
At the control of the city of the city of the control of the city	and the Heifers Association Detect (HAD) from Femilia Managed Franklin
At the request of the client, this appraisal report as been prepared in compliar	
Mac. The UAD requires the Appraiser to use standardized responses that inc	lude specific formats, definition, abbreviations and acronyms. In the normal
course of business, the Appraiser attempted to obtain an adequate amount of	information regarding the subject and comparable properties. Some of the
required UAD standardized responses, especially those in which the Appraise	
	orrect or typical in the normal course of business. Examples include condition
and quality ratings as well as comparable sales and listing data. Not every ele	ement of the subject property was viewable and comparable property data
was generally obtained from third party sources. Consequently, this informati	on should be considered an "estimate" unless otherwise noted by the
Appraiser.	
Francisco Times. As actionated assessment of times the authorst some authorized by	
	e been listed on the market, prior to a hypothetical sale at market value on the
effective date of the appraisal. It is a retrospective estimate based on past ev	ents, and is presumed to occur prior to the effective date of this report. The
overall concept of reasonable exposure time includes not only an adequate, s	ufficient, and reasonable amount of time, but also, adequate, sufficient and
reasonable effort. It is different from marketing time, which is the amount of t	me it might take to sell the subject property, if it were placed on the market
after the effective date of this report. An estimate of reasonable exposure time	
•	e for the subject property has been based on the actual days of market of
similar competing properties within the market area.	
A reasonable exposure time for the subject property developed independently	from the stated marketing time is: 60 days. Marketing time is noted on page
1 of the appraisal and is completely independent of exposure time.	J
тольно арргановната в оотпристоту тиверепиеть от вхрозите што.	
USPAP Prior Services Disclosure: I have performed no services, as an app	aiser or in any other capacity, regarding the property that is the subject of this
report within the three-year period immediately preceding acceptance of this a	ssignment.

Freddie Mac Form 2055 March 2005

UAD Version 9/2011

Page 3 of 6

1 2055 March 2005

Exterior-Only Inspection Residential Appraisal Report

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a visual inspection of the exterior areas of the subject property from at least the street, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

The appraiser must be able to obtain adequate information about the physical characteristics (including, but not limited to, condition, room count, gross living area, etc.) of the subject property from the exterior-only inspection and reliable public and/or private sources to perform this appraisal. The appraiser should use the same type of data sources that he or she uses for comparable sales such as, but not limited to, multiple listing services, tax and assessment records, prior inspections, appraisal files, information provided by the property owner, etc.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 4. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 5. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- 2. I performed a visual inspection of the exterior areas of the subject property from at least the street. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- 9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

Sandra S. North

- 20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.
- 21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).
- 22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.
- 23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.
- 24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.
- 25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

- 1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.
- 4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a papersional report shall be as effective, enforceable and delivered containing my original hand written signature.

File No. 55853

FIRREA Certification Statement: The appraiser certifies and agrees that this appraisal report was prepared in accordance with the requirements of Title XI of the Financial Institutions, Reform, Recovery, and Enforcement Act (FIRREA) of 1989, as amended (12 U.S.C. 3331 et seq.), and any applicable implementing regulations in effect at the time the appraiser signs the appraisal certification.

SCOPE OF WORK: The scope of work for this appraisal is to estimate the market value of the subject property by:

- (1) physical inspection of the subject property;
- (2) inspection of the subject neighborhood and an analysis of regional characteristics;
- (3) identifying the appraisal problem;
- (4) investigation of pertinent data from available and reliable sources;
- (5) consideration and analysis of the physical, governmental, social and economic factors to conclude the highest and best use of the subject property;
- (6) extensive research for sold properties and current listings from the area Multiple Listing Service (MLS) or other sources deemed reliable;
- (7) analysis of the elected comparable sales and competitive listings, including additional verification from a second reliable source when appropriate and possible;
- (8) consideration and application of the applicable approaches to value;
- (9) final reconciliation, and
- (10) reporting of a defined value

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specific date and the passing of title from seller to buyer under conditions whereby:

- (1) buyer and seller are typically motivated;
- (2) both parties are well informed or well advised, and each acting in what they consider their own best interest:
- (3) a reasonable time is allowed for exposure in an open market;
- (4) payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions by anyone associated with the sale.

 (Source of Definition: "The Appraisal of Real Estate" Twelfth Edition, Appraisal Institute, Chicago, IL.)

OBSERVATION VS. INSPECTION: The routine inspection of the property and its improvements is for purposes of establishing the market clause of the property. The property "inspection" is really more of an observation. It is not regarded as a full property inspection of the type intended to reveal defects in the mechanical systems, structural integrity, roofing, siding, or any other property component. The Appraiser claims no special expertise in these areas, nor is the Appraiser an expert regarding issues relating to foundation settlement, moisture problems, radon gas, mold or mold like substances, or lead paint. Statements regarding condition are based on superficial observations only. The Appraiser is not a home inspector, and as such the Client is invited and encouraged to employ qualified experts to inspect and address any areas of concern. If negative conditions are discovered, the Appraiser should be notified as the value opinion will possibly require modification.

ADVERSE ENVIRONMENTAL CONDITIONS: No environmental assessment was conducted as this is outside the scope of the appraisal and the Appraiser does not accept responsibility for such discovery. No readily apparent environmental conditions were observed during the course of the property inspection (unless otherwise noted herein) and it is assumed that none exist. If any adverse environmental conditions are discovered, the Appraiser should be notified as this could have an impact on the value opinion.

The Appraiser makes it known that the location of the property is in an area EPA has noted has a high potential for Radon Gas. The Appraiser has not tested the property for such a substance and assumes if a test were conducted, it would show the subject to be free from this hazard or if there is a radon mitigation system on site, it is doing what it is designed to do. A test is recommended to be assured there is no radon. If the Appraiser's assumption is incorrect, the analyses and value could be impacted.

STRUCTURAL AND MECHANICAL SYSTEMS: No liability is assumed for the structure or mechanical elements of the property. It is assumed that there are no structure defects hidden by floor or wall coverings or any other hidden or unapparent conditions of the property; that all mechanical equipment and appliances are in good working condition, and that all electrical components and the roofing are in good condition (unless otherwise noted herein). If the client has any questions regarding these items, it is the client's responsibility to order the appropriate inspections. Inspections of these items are outside the scope of this assignment and the Appraiser assumes no responsibility for these items.

The appraiser's inspection did not include identification or testing for mold, radon, UFFI, asbestos, or other environmental hazards, as identification of these substances is beyond the scope of the Appraiser's expertise.

NON-REAL PROPERTY TRANSFER: No personal property, furnishings or intangibles were included in the opinion of value.

HIGHEST AND BEST USE: Highest and Best Use may be defined as, "The reasonably probable and legal use of vacant land or an improved property, which is physically possible, appropriately

Sunnlemental Addendum

	Supp	lementa	l Addendum		File	No. 55853		
Borrower	Catamount Properties 2081 LLC							
Property Address	6214 S Ider Way							
City	Aurora	County	Arapahoe	State	СО	Zip Code	80016	
Lender/Client	Wedgewood Inc							

supported, financially feasible, and results in the highest value. The four criteria that must be met are legal permissibility, physical possibility, financial feasibility, and maximum profitability.

The subject property is currently utilized as a residential dwelling. The current and present use offers maximum profitability while being legal, physically possible and financially feasible. Therefore, the Highest and Best Use of the subject is considered to be its current use, as presently improved.

COMMENTS ON SITE DIMENSIONS: It is outside the scope of work for the Appraiser to measure the site, that is a surveyor's responsibility and expertise. If a plat map is available, it is included herein. It is deemed as reliable as the source providing it.

COMMENTS ON SQUARE FOOTAGE: The square footage totals noted in this appraisal report have been utilized as a tool for comparison. One should rely on their own independent measurements if square footage is considered to be an important factor.

"*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment." (This was quoted from the March 2005 version of FNMA form 1004.)

The Appraiser made a personal inspection of the subject property (interior and exterior if an interior product or exterior only for an exterior only product), and a personal exterior inspection of all comparable sales/rentals (if applicable) used in the report.

This report contains digital photos and all digital photos have not been altered in any way except as noted (due to persons in the photos, photos with portraits in them, etc. which is unacceptable to FNMA, FHLMC, etc.). Photos are Appraiser originals unless otherwise noted below.

Extra Comments

Address on Signature page of this report is for the National Field Appraiser Management Office. I reside in Colorado, am competent to appraise in this market and I have been providing appraisal services in this market for the last 30 years.

"Other" includes parks, open spaces, etc. with no impact on marketability or appraisal

Comps over 6 months (if included) are included as they are the most recent and relevant comparable to the subject. This is not a declining market area and is not considered an issue to have sales as far back as 9 months to one year.

Typically "age" adjustments are not made as they cannot be proven in the Metro market area. Condition/updating/upgrading are the larger factors for a typical buyer in this area.

If the subject is directly impacted by roads, schools, or commercial uses, it will be fully disclosed and analyzed herein. If it is not, there is no impact noted. Subject is surround by residential uses. There is multi-family complex located approximately 1/2 mile east across an open space and on the other side of neighborhood homes. There is a community park located approximately 1/2 mile northeast. There is the Aurora YMCA located approximately 1 mile northeast. None of these have a direct impact on the subject. Southlands Mall is located approximately 1mile west and has no direct impact. Aurora Reservoir is located approximately 2 miles northeast with nor direct impact. There is nothing noted within this area that has a direct impact on the subject which is surrounded by residential uses other than what is disclosed in the Neighborhood Description Section.

If FEMA indicates there is a disaster declaration anywhere near the subject or the subject county, it is noted that the subject was not impacted directly or it would be duly noted herein with any impact fully disclosed. FEMA declared all of Arapahoe County a disaster site from June of this year. Much of Arapahoe County was not directly impacted by excessive rain, hail, or tornados. Without viewing the subject directly, there is no way to verify if the subject had any impact but this area as a whole has been noted to have been minimally or not impacted.

Exterior Only: Neighborhood Description

The subject is located in a neighborhood referred to as Wheatlands. Homes in the area vary in style but tend to be "traditional" in nature, i.e. ranch, 2 story, split level. Maintenance levels are typically good overall. Foreclosures are negligible in this area at this time.

This area is located approximately 16 miles from Park Meadows Mall and 13 miles from the Denver Tech Center which offers potential employment. This area is located approximately 22 miles from Downtown Denver and 18 miles from Cherry Creek, both offering dining, entertainment, shopping and employment centers. Denver International Airport is approximately 24 miles north.

Public transportation is available on any of the major streets in the area. Commercial uses are located along Smoky Hill Road and S Aurora Pkwy and have no impact on the subject. Schools are located within the area and this area is part of the Cherry Creek School system.

This area is located approximately 7 miles southeast of Buckley Air Base and at times there is air traffic noise in this area. This is well known and accepted throughout this area. All comps have the same.

Supplemental Addendum

	Sup	plemental	l Addendum		File	e No. 55853		
Borrower	Catamount Properties 2081 LLC							
Property Address	6214 S Ider Way							
City	Aurora	County	Arapahoe	State	СО	Zip Code	80016	
Lender/Client	Wedgewood Inc							

• Exterior-Only: Sales Comparison Analysis - Summary of Sales Comparison Approach Search for data began within the immediate subject neighborhood for sales that closed within 90 days, 180 days, 6 months and in some cases data has to be considered as far back as one year if not plentiful. A thorough attempt has been made to provide data that brackets the subject as much as possible. Data was then narrowed to that which is most similar and best represents the subject and would be the subject's competition if the subject is listed for sale. No sales concessions adjustments are made to the comps unless it is proven that sold price was increased to cover these.

Adjustments were made based on market data available for significant differences between the comparables and the subject. When a difference between a comparable and the subject was noted; however, market data did not support an adjustment or there was insufficient data to determine market reaction to such difference, a '0' is indicated in the adjustment line.

Four closed sales were noted as relevant and provided herein. They bracket the subject by adjusted and unadjusted sales price, lot size, age, GLA, basement size and basement finish.

Sale 1 is recent, is larger and has a walk out basement but a 2 car garage.

Sale 2 is next most recent, is smaller but has a finished basement. It has a walk out basement and 2 car garage.

Sale 3 appears to be the same model as the subject without a finished basement at time of sale.

Sale 4 is larger with a larger walk out basement and an additional 1/2 bath.

Sale 1 backs to open space. Sale 4 backs to open space and has mountain views. Please note the utility tower noted in the photo is in fact 2 houses away and not directly impactful of this sale (poor camera angle).

Pairing of the four sales in the report resulted in the lot size adjustment made to sale 2. Pairing of sales within the report resulted in a GLA adjustment of \$50 psf. Basement adjustment of \$20 psf with finish at \$15 was via pairing of sales 2 and 3. Garage adjustment is per typical return in this area.

Bath adjustments are \$5000 for full bath and \$2000 for 1/2 bath. Fireplace is per typical to this area.

Walk out basement is per pairing of the four sales with the view adjustment to sales 2 and 4 via pairing and remaining extraction. Sale 2 has some mountain views but also backs to a busy street in the area, noted as an off set.

Sales concession adjustment is reported impact/increase on sales price to cover and per pairing of the sales within.

Greatest weight is given to sale 3 as it appears to be the same model with next most to sale 2 for basement finish. Sales 1 and 4 offer further overall support.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C/

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

Sandra S. Mouth

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Ω4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

O.F

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and ungrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:

3.2 indicates three full baths and two half baths.

Reasonable Exposure Time	
·	parket value ateted in this report is:
My opinion of a reasonable exposure time for the subject property at the m	
Exposure Time: An estimated amount of time the subject property would have been	en listed on the market, prior to a hypothetical sale at market value on the effective date of the
appraisal. It is a retrospective estimate based on past events, and is presumed to	occur prior to the effective date of this report. The overall concept of reasonable exposure time
includes not only an adequate, sufficient, and reasonable amount of time, but also,	adequate, sufficient and reasonable effort. It is different from marketing time, which is the
amount of time it might take to sell the subject property, if it were placed on the ma	rket after the effective date of this report. An estimate of reasonable exposure time for the subject
property has been based on the actual days of market of similar competing proper	ties within the market area. A reasonable exposure time for the subject property developed independently
from the stated marketing time is: 60 days. Marketing time is noted on page 1 of the appraisal an	d is completely independent of exposure time.
