Freddie Mac Form 2055 March 2005

Out Aut

Form 2055 March 2005

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended user, intended user, intended user, intended user, definition of market value, or assumptions and limiting conditions, are not permitted. The appraisal appraisal assignment. Modifications or deletions or deletions or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a visual inspection of the exterior areas of the subject property from at least the street, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

The appraiser must be able to obtain adequate information about the physical characteristics (including, but not limited to, condition, room count, gross living area, etc.) of the subject property from the exterior-only inspection and reliable public and/or private sources to perform this appraisal. The appraiser should use the same type of data sources that he or she uses for comparable sales such as, but not limited to, multiple listing services, tax and assessment records, prior inspections, appraisal files, information provided by the property owner, etc.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE:

The most probable price which a property should bring in a competitive and open the passing of title from seller to buyer under conditions are well informed for exposure in the open market; (4) payment is allowed for creative thereto; and (5) the price representation of creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: to the following assumptions and limiting conditions:

The appraiser's certification in this report is subject

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 4. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist.

 Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 5. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

orm 2055 March 2005

APPRAISER'S CERTIFICATION:

The Appraiser certifies and agrees that

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- 2. I performed a visual inspection of the exterior areas of the subject property from at least the street. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal
 Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- 9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

Freddie Mac Form 2055 March 2005

UAD Version 9/2011

Fannie Mae Form 2055 March 2005

General Text Addendum File No. 0510242

Borrower	Redwood Holdings LLC							
Property Address	4779 Windsor Blvd							
City	Cambria	County	San Luis Obispo	State	CA	Zip Code	93428	
Lender/Client	Wedgewood Inc							

• Exterior-Only: Scope of the Appraisal

Per prior agreement with the client, the appraiser did not do an interior physical inspection of the subject home. Amenities and physical characteristics of the subject were derived from tax records via Realist, visual observations of the property from the street, and analysis of aerial photo imagery. Additionally, the appraiser did not utilize the cost or income approach to value. Data was collected from a variety of possible sources, this form summarizes the process and conclusion of value for the sales comparison approach and final value estimate. The purpose of this appraisal is to estimate the market value of the subject property as of the effective date of the appraisal.

Exterior-Only: Neighborhood - Description

The subject is located in Central Cambria along the Pacific Ocean. The subject's neighborhood, Sea Cliff Estates, has as strand of ocean front homes and a strand of homes directly across the street from the ocean front homes. Growth in this neighborhood and all of Cambria is slow due to water restrictions and lack of ocean lot front lots. The overall appearance and market appeal of the properties are rated good. Schools, shopping, and services are located within reasonable proximity of the subject area. "Other" in percent land use is generally characterized as, vacant land, schools, etc..

• Exterior-Only: Neighborhood - Market Conditions

Conventional financing and cash are common for the area. Buy Downs and concessions occur sporadically. The number of listings in the subject area is considered slightly below average for current conditions. Typical exposure time for homes that are properly priced is approximately 15 to 45 days in the current market, although some properties may take longer than 45 days to sell due to such factors as pricing and access/availability. This typical exposure time also applies directly to the subject.

• Exterior-Only: Highest and Best Use

The appraiser has reviewed market data, zoning and pattern of construction in area. The appraiser has made the conclusion of the highest and best use as indicated in the report based on the best evidence of this indicator. The analysis is outlined in the report.

• Exterior-Only: Sales Comparison Analysis - Summary of Sales Comparison Approach

Data sources relied upon for research included the San Luis Obispo CRMLS, public records via Realist and Core Logic, and other market participants (agents, buyers, sellers, builders, etc.). The sales cited in the appraisal report represent the most current, comparable, and closest discovered by the appraiser that could reasonably be compared to the subject property.

This market area due to its exclusivity and size produces a limited number of sales. Updates and condition do play a key factor with value in this market along with location and view. The market has fluctuated slightly over the past two and half years and is considered stable at this time. Some spikes appear in the provided graph. These are due to low volume of sales easily skewing the graph . Time adjustments were not made to the comparables (see 3 Year Cambria SFR Median Price Graph).

Comparables 7 and 8 are pending sale that are included as additional evidence of the most recent market activity for competing properties. They have not been adjusted for their listing price status, although doing so may be considered somewhat speculative due to some inconsistencies in the pricing levels of competing properties. This is evident with this comparable, and the closed sales which show closed-to-listing price ratios at 100%.

Sales Grid Adjustments

The adjustment process/sales comparison analysis is summarized on the previous pages. Adjustments utilized within the grid for line item differences were determined using one or more of the following methodologies: paired data analysis of recent sales or by historical comparison as a percentage if there are not current matching pairs, grouped data analysis, simple linear regression, and depreciated cost estimates. Sensitivity analysis within the grid and cost analysis are also used to refine and test the reasonableness of these adjustments.

* Interviews with agents and other market participants revealed that variances in lot sizes (estimated at approx. 1,000 sf or less) are generally not recognized as significant by typical buyers in this market. Therefore, no adjustment was made for the site size variances of less than 1,000 sf.

Nominal upward adjustment for quality was considered warranted to Comps 7 as assessor data indicates a slightly lower building class rating than the subject for this property. Nominal downward adjustment for quality was considered warranted for Comp 1 as assessor data indicates a slightly higher building class rating than the subject for this property.

Adjustments for some differences identified in the sales grid, however, cannot be directly extracted or supported by the available market data with a high degree of accuracy. (e.g. age, bedrooms, and landscape/site imp.). Therefore, no adjustment is applied for these differences. Although it was concluded that the market reaction to these differences could not be quantified, these factors are taken into consideration during the final reconciliation and the appraiser's professional judgment is applied based on prior observations of the reactions of typical/knowledgeable buyers' and sellers' in the market. Age adjustment was not considered warranted as this is generally a factor of condition in this market seament.

Besides those noted, other physical features were considered similar to the subject and did not require additional adjustments. The comparables discovered and utilized in this analysis, which were verified by the Multiple Listing Service, agent, and/or San Luis Obispo's County Recorder's Office, are considered the best available data at the time of sale and viable indicators of value for the subject.

Borrower Redwood Holdings LLC Property Address 4779 Windsor Blvd City Cambria County San Luis Obispo State CA Zip Code 93428 Lender/Client Wedgewood Inc

Besides those noted, other physical features were considered similar to the subject and did not require additional adjustments. The comparables discovered and utilized in this analysis, which were verified by the Multiple Listing Service, agent, and/or San Luis Obispo's County Recorder's Office, are considered the best available data at the time of sale and viable indicators of value for the subject

• Exterior Only: Reconciliation - Reconciliation and Final Value Conclusion

The sales utilized in the sales grid were those that were considered to represent the predominant indications of the market segment. Conclusion gave slightly more consideration to Comps 1 and 5 as Comp 1 was the sale with the lower percentage of adjustments and an ocean front property while Comp 5 is closest in proximity to the subject as it is located in the subject's neighborhood.

All comparables except for Comparable 1 fell outside the recommended guidelines for percentage adjustments. This was due to the limited number of ocean front sales (large location adjustments) and need to bracket the subject.

Based upon the analysis detailed in this report, the appraiser estimates a reasonable exposure time for the subject property developed independently from the stated marketing time is 15 to 45 days for the subject property at the opinion of market value reported herein.

• Exterior-Only: Conditions of Appraisal

The subject property has been appraised on an "as is" basis, with any extraordinary conditions noted. The appraiser is not a construction expert and assumes no liability for mechanical or structural elements of the subject property.

Additional Comments

Site Valuation

Cambria has been on a water moratorium since 2001 where in the past none to only a few homes are allowed to be built per year. Currently the California Coastal Commission has instructed the City of Cambria not to issue any new build permits. A city water (CCSD) list of approximately 300 property owners exists. A secondary county water list of approximately 600 property owners also exists. The city water list has priority over the county. Most properties are sold without a water position as it costs money upfront and money each year to maintain a position. Water rights positions can be sold without the property and the purchaser can attach the water rights position to their own property. A number 1 position can bring \$300,000 +. Current wait time at position 150 can be 20 years. This is why land values without a position are low such as the comparable land sales used in the cost approach. Also see "Ocean Front Property Locations"

The subject's value of opinion is higher than the predominant one unit housing price. This is due to the subject's larger square footage when compared to the predominant one unit house square footage of 1600 sf. In addition, the subject's ocean front site generates substantial additional value (see Ocean Front Property Location Values).

The subject last transfer date took place in 1997. Data, information, and pictures was limited to determine interior materials and condition.

Septic system was an auto fill from Total's access to public records. The appraiser cannot confirm the septic system.

Comparable quality and condition ratings/adjustments based on appraiser's observations MLS pictures of materials used and other appraiser observed appraiser ratings and comments.

Lender/Client	Wedgewood Inc							

1. Bower name added

- 2. The appraiser used San Luis Obispo's County Assessor's Website to determine bedroom count and added a copy of the website page to the report. The appraiser observed a discrepancy on bedroom counts when attempting to locate interior pictures from real estate websites such as Zillow which has bed counts at 4 and Realtor.com which has bed counts at 6.
- 3. Current location adjustment for Comp 6 is sufficient. Cambria is a wooded area with coastline. Comparable 6's neighborhood is urban in a wooded setting. Though comparable six is outside of the subject's neighborhood, the location of comparable 6's neighborhood produces similar values to the comparables used in the report. An MLS search page was added to the report from comparable 6's neighborhood, using the same search parameters for the subject's search, as evidence of the value from this neighborhood's location.
- 4. MLS photo added for comparable 1.

Sales Near the Subject, Ocean Front Properties

- 1. 4751 Windsor Blvd, Cambria 5/2.1, 3348 sf, Lot 15246 sf, Built, Age 49, Quality C3, Cond C4+, sold 07/16, \$2,525,000.
- 2. 4699 Windsor Blvd, Cambria 4/3, 2638 sf, Lot 8600 sf, Built, Age 55, Quality C2 Cond C2, sold 07/16, \$3,000,000.

Sales Near the Subject, Opposite Ocean Side of Street

- 3. 4640 Windsor Blvd, Cambria 4/3, 2891 sf, Lot 6690 sf, Built, Age 49, Quality C3 Cond C3, sold 05/23, \$2,100,000.
- 4. 4680 Windsor Blvd, Cambria 4/3, 2891 sf, Lot 6724 sf, Built, Age 48, Quality C3 Cond C3, sold 05/23, \$2,005,000.
- 5. 4734 Windsor Blvd, Cambria 4/2.2, 3196 sf, Lot 7500 sf, Built, Age 23, Quality C3 Cond C3 -, sold 05/23, \$1,675,000.

The ocean side of the subject's street generates \$500,000 to \$1,000,000 dollars more in value. This is consistent throughout beach towns in San Luis Obispo County.

The above properties are located in the subject's neighborhood, the Sea Cliff Estates neighborhood. Sale 1 is located two houses to the south of the subject and Sale 2 is located 4 houses to the south of the subject. Sale 5 is located across the street from Sale 1.

DEFINITION OF INSPECTION:

Wedgewood Inc

Borrower
Property Address
City
Lender/Client

The term "Inspection", as used in this report, is not the same level of inspection that is required for a "Professional Home Inspection". The appraiser does not fully inspect the electrical system, plumbing system, mechanical systems, foundation

system, floor structure, or sub floor. The appraiser is not an expert in construction materials and the purpose of the appraisal is to make an economic evaluation of the subject property. If the client needs a more detailed inspection of the property, a home inspection, by a Professional Home Inspector, is suggested.

DIGITAL SIGNATURES:

The signature affixed to this report, and certification, were applied by the original appraiser and represent their acknowledgements of the facts, opinions, and conclusions found in the report. The appraiser applied his or her signature electronically using a password encrypted method. Hence these signatures have more safeguards and carry the same validity as the individual's hand applied signature. If the report has a hand-applied signature, this comment does not apply.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy, however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

Quality Ratings and Definitions (continued)

QЗ

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Ω4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

$Little\ or\ no\ updating\ or\ modernization.\ This\ description\ includes,\ but\ is\ not\ limited\ to,\ new\ homes.$

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:

3.2 indicates three full baths and two half baths.
