Comments Regarding Pricing Strategy		
<p>The market is currently experiencing historic low inventory levels. The market is also experiencing historic low average Days On Market (DOM.) The market is also experience strong demand due to strong employment growth from an influx of large employers. Rental availability is also at historically low levels. The post pandemic flux has not has any significant effect on value but has decreased supply and increased demand creating an environment where the average list to sold price ratio is 103% and making the rental market prices increase by 67% due to tight supplies by the simple economic theory of supply and demand.</p>
