This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a visual inspection of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

The appraiser must be able to obtain adequate information about the physical characteristics (including, but not limited to, condition, room count, gross living area, etc.) of the subject property from the exterior-only inspection and reliable public and/or private sources to perform this appraisal. The appraiser should use the same type of data sources that he or she uses for comparable sales such as, but not limited to, multiple listing services, tax and assessment records, prior inspections, appraisal files, information provided by the property owner, etc.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.

2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.

3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

4. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the prosence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as a newformental assessment of the property.

5. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.

9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.

10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.

11. I have knowledge and experience in appraising this type of property in this market area.

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

Quality Ratings and Definitions (continued)

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes. Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example: 3.2 indicates three full baths and two half baths.

SUPPLEMENTAL ADDENDUM

NEIGHBORHOOD AND SITE COMMENTS:

THE SUBJECT IS LOCATED WITHIN LOS ANGELES COUNTY IN THE CITY OF CARSON, CALIFORNIA. THE NEIGHBORHOOD IS A SUBURBAN RESIDENTIAL COMMUNITY OF MEDIUM POPULATION DENSITY, WHICH IS TYPICAL FOR THE AREA. IT IS BUILT UP WITH QUALITY DETACHED AND ATTACHED RESIDENTIAL DWELLINGS VARYING IN DESIGN AND SIZE, EACH WITH INDIVIDUAL MARKET APPEAL. THE SUBJECT PROPERTY IS IN CLOSE PROXIMITY TO NEIGHBORHOOD SCHOOLS, PARKS, SHOPPING. MASS TRANSIT SYSTEMS ARE AVAILABLE IN THE AREA.

SITE COMMENTS:

THE SUBJECT IS REMOVED FROM HEAVILY TRAVELED THOROUGHFARES AND THEREFORE DOES NOT SUFFER FROM DETRIMENTAL EFFECTS OF TRAFFIC AND NOISE. NO ADVERSE EASEMENTS, ENCROACHMENT OR DETRIMENTAL CONDITIONS WERE NOTED AT THE TIME OF INSPECTION. CENTRAL UTILITIES WERE AVAILABLE, ELECTRIC LIGHTS LINE THE STREETS. THERE WERE NO ENVIRONMENTAL CONDITIONS NOTED, OBSERVED OR KNOWN TO THE APPRAISER WHICH ARE ADVERSE OR HAZARDOUS.

SALES COMPARISON COMMENTS:

FOUR OF THE COMPARABLES ARE CONFIRMED CLOSED SALES AND ONE IS A PENDING LISTING. THESE ARE THE MOST RECENT COMPARABLE SALES AVAILABLE AND ARE SIMILAR IN OVERALL MARKET APPEAL/PHYSICAL FEATURES. THE DESIGN OF THE SUBJECT AND COMPARABLE PROPERTIES ARE SIMILAR. ALTHOUGH STYLE OF THE EXTERIOR MAY DIFFER FOR EACH OF THE COMPARABLES VERSUS THE SUBJECT, THIS DIFFERENCE WILL NOT AFFECT MARKET APPEAL. ALL OF THE SALES WERE CONSIDERED TO BE THE MOST INFLUENTIAL SALES DUE TO PROXIMITY AND SIMILARITY TO THE SUBJECT PROPERTY. ALL COMPARABLES ARE SIMILAR TO THE SUBJECT PROPERTY IN PRIMARY PHYSICAL FEATURES.

GENERAL ADJUSTMENTS HAVE BEEN MADE FOR LOT SIZE, QUALITY OF CONSTRUCTION, CONDITION, SQUARE FOOTAGE, BATHROOM COUNT, BEDROOM COUNT AND AIR CONDITIONING. ALL ADJUSTMENTS ARE CONSIDERED TYPICAL FOR THE MARKET REACTION WITHIN THE SUBJECTS MARKET AREA.

LOT SIZE ADJUSTMENTS WERE MADE FOR DIFFERENCES GREATER THAN 500 SQUARE FEET AT \$7.00 A SQUARE FOOT, NO ADJUSTMENT WAS MADE FOR DIFFERENCES LESS THAN 500 SQUARE FEET SINCE THE APPRAISER WAS UNABLE TO DETERMINE A MARKET REACTION FOR LESS THAN 500 SQUARE FEET. LOT SIZE ADJUSTMENTS WERE MADE BASED ON A PAIRED SALES ANALYSIS WITHIN THE SUBJECTS MARKET AREA AND CONSIDERED TYPICAL FOR THE MARKET AREA.

CONDITION ADJUSTMENTS WERE MADE BASED ON THE MLS NOTES, MLS PHOTOS AND AN EXTERIOR INSPECTION OF THE COMPARABLES, COMPARABLES NUMBER ONE AND TWO HAVE THE SAME OVERALL CONDITION RATING AS THE SUBJECT HOWEVER A SMALL ADJUSTMENT (\$30,000.00) WAS MADE SINCE THESE COMPARABLES WERE IN NEED OF SOME REPAIR. A LARGER ADJUSTMENT (\$35,000.00) WAS MADE TO COMPARABLES NUMBER THREE AND FOUR SINCE THESE COMPARABLES ARE REMODELED AND HAVE SUPERIOR KITCHEN AND BATHROOMS. CONDITION ADJUSTMENTS WERE MADE BASED ON A PAIRED SALES ANALYSIS WITHIN THE SUBJECTS MARKET AREA AND CONSIDERED TYPICAL FOR THE MARKET AREA.

A QUALITY OF CONSTRUCTION ADJUSTMENT (\$20,000.00) WAS MADE TO COMPARABLE NUMBER FOUR SINCE THIS COMPARABLE HAS SUPERIOR LANDSCAPING AND HARDSCAPING TO THE SUBJECT. THE MARKET DATA IS SUFFICIENT TO DETERMINE WITH REASONABLE CERTAINTY THE VALUE OF THE SUBJECT PROPERTY. THE APPRAISER HAS RESEARCHED THE SUBJECT MARKET AND SELECTED THE SALES MOST SIMILAR AND PROXIMATE, WHICH HAVE CLOSED ESCROW IN THE MOST RECENT PAST AND REQUIRED THE LEAST AMOUNT OF ADJUSTMENTS.

FINAL RECONCILIATION COMMENTS (CONTINUED):

THE COST APPROACH TENDS TO SET THE UPPER LIMITS OF VALUE; THE INCOME APPROACH WAS CONSIDERED HOWEVER HAD LESS WEIGHT AND CONSIDERATION DO TO THE LACK OF RENTAL SINGLE FAMILY PROPERTIES AND CONDOMINIUMS IN THE SUBJECTS MARKET AREA; THE SALES COMPARISON APPROACH IS CONSIDERED TO BE THE BEST INDICATOR OF VALUE. THERE WERE RENTAL COMPARABLES IN THE SUBJECTS MARKET AREA HOWEVER THERE WERE MORE CLOSED COMPETING SALES THAN MARKET RENTALS. THE LATTER APPROACH REFLECTS RECENT ACTIVITY IN THE MARKETPLACE AND IS GIVEN THE MOST INFLUENCE IN ESTIMATING VALUE. THE FINAL RECONCILIATION IS A WEIGHING PROCESS BASED UPON INFORMATION OBTAINED FROM DOCUMENTARY SOURCES AND THE MARKETPLACE, AS THEY APPLY TO THE SUBJECT PROPERTY.

MORE WEIGHT AND CONSIDERATION WAS GIVEN TO COMPARABLE NUMBER ONE SINCE IT IS THE MOST SIMILAR CLOSED COMPETING SALE WITH THE LEAST AMOUNT OF ADJUSTMENTS. SLIGHTLY LESS WEIGHT AND CONSIDERATION WAS GIVEN TO COMPARABLES NUMBER TWO, THREE AND FOUR SINCE THEY ARE THE NEXT MOST SIMILAR CLOSED COMPETING SALES. LESS WEIGHT AND CONSIDERATION WAS GIVEN TO COMPARABLE NUMBER FIVE SINCE IT IS A PENDING LISTING AND THE FINAL SALES PRICE HAS NOT BEEN DETERMINED YET.

ADDITIONAL COMMENTS:

THE SUBJECT WAS NOT APPRAISED AT THE PREDOMINANT PRICE FOR HOMES IN THIS AREA. IT IS NOT UNCOMMON FOR THIS TYPE OF HOME TO BE IN THE UPPER RANGE OF MARKET VALUE AND NOT BE CONSIDERED AN OVER IMPROVEMENT. THIS HAD NO ADVERSE EFFECT ON THE SUBJECTS VALUE OR MARKETABILITY.
